

About Us

Monoatom Labs is brain child of Sushanth Paatnaik, 6 times President of India Awardee. His innovation journey started at age of 11. Aayush Bansal is an astout businessman from Maharashtra with steel manufacturing and clothing business over 38 years. Sushanth Paatnaik Develops Graphene Innovations, Aayush is instrumental in deploying Innovations in the Industry. Monoatom Labs team has scientists from reputed institute like IISC, IIT and National Chemical Laboratory as research and development partners.

At Monoatom Labs we challenge the normal, set performance benchmarks for materials and achieve them using graphene based solutions. We develop lab scale Innovations, test and validate results and then setup commercial scale manufacturing of such solutions to make them commercially viable to use in industry. Our solutions have applications in Aerospace, Defence, Clean energy storage, Solar Panel efficiency improvement, Construction Industry, Tyre Industry, Chemical and Water filtration, Specialized Engineering components, High performance clothing and polymers.

Applications !

- Automotive exterior paint surfaces
- Two-wheelers & premium motorcycles
- Luxury & commercial vehicles
- Marine painted surfaces
- Exterior painted metal & alloy surfaces
- Architectural painted panels & façades
- Industrial painted equipment & enclosures

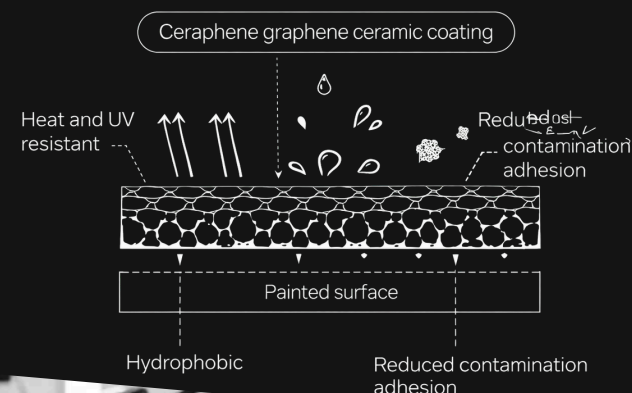

Why Choose Us?

- Advanced graphene-enhanced ceramic formulation
- Bonds directly to painted surfaces
- Improves aesthetics while delivering functional protection
- Reduces maintenance frequency and surface wear
- Designed for harsh outdoor environments

How It Works ?

Ceraphene utilises graphene nano-platelets embedded within a ceramic coating matrix. Once applied, this structure enables:

- Formation of a dense, chemically bonded protective layer
- Enhanced resistance to heat, UV radiation, and oxidation
- Reduced surface porosity, limiting dust, dirt, and contaminant adhesion

Cost Benefit Analysis

- Ceraphene price: ₹ 5,000 / 50 ml
- Competitor average price: ₹ 15,000 / 50 ml (typical premium ceramic coatings)
- Performance life (expected): Ceraphene 2–5 years, Competitors 2–5 years
- Installed panel area: 1 average passenger vehicle surface
- Maintenance: Annual cleaning cost considered where relevant

Why our Product is Superior ?

- Up to 60–70% lower cost than premium ceramic coatings for similar durability
- Graphene-enhanced formulation at a price where most competitors offer ceramic-only chemistry
- Lower cost per protection year, improving value for customers and applicators
